Professional Summary

During these 4 years as Front-End Software Engineer, I've accumulated experience such as mentored successfully junior developers. My role has extended beyond coding to effective communication with various departments, to define new features and spearheading the development of new apps.

Work History

Software Engineer React

Jun 2020 - Current

Grupo Click IP Tecnologia (Internet provider holding)

Manaus, Amazonas

- Developed React web app to avoid overloading the call center during Internet issues. (Vite, Zustand, Chakra UI). On average, we have reduced support tickets by 35% during a network issue.
- Developed React web app to document all router models used by the company. (Next.JS, Zustand, Tailwind). Reducing the use of spreadsheets.
- Developed React Native app to customers to get Bills, see contracts info, data used, and report payment. (React Native CLI, Styled Components).
- Helped the team to implement Unit Test with Jest and React Testing Library for the Front-End applications.

Main activities:

- Led the development team Squad. (3 devs juniors and 1 UI Designer)
- Designed interfaces for web and mobile apps using Figma.
- Published the first company's React Native app on Google Play and App Store.
- Automatized deployments for frontend and backend projects using GitHub Actions.
